## Digital Moisture Meter

The moisture meter is used to measure the moisture level in sawn timber (also cardboard, paper) and hardened materials (plaster, concrete and mortar). It displays the moisture level. The instrument has an average adjustment for European wood based on a wood temperature of 68°F (20°C).

Specifications	
Measuring principle	Electrical resistance
Electrode length	5/16" (8 mm)
Electrodes	Integrated, replaceable
Measuring range	Wood 6 to 44% Material 0.2 to 2%
Accuracy	Wood +/-1% Material +/-0.05%
Battery	Cr 2032 (3 pcs)
Housing	Impact-proof plastic housing
Ambient temperature	32°F to 104°F (0°C to 40°C)
Ambient moisture	0 to 85%
Size	5.1" x 1.6" x 1.3" (130 mm x 40 mm x 33 mm)
Weight	3.5 oz (99 g)
